DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, are drawn to a method of procuring a component, classified in class 705, subclass 37.
- II. Claim 11, is drawn to a method of procuring a component associated with a custom system comprising establishing a custom system design, classified in class 705, subclass 97.

The inventions are distinct, each from the other because of the following reasons: Although both inventions are related to auctions, the second invention establishes a custom system design.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
